

FARQUHAR INLET ACCESS

The map above indicates the least bird disruptive points of access to Farquhar Inlet, Old Bar.

- A. Mudbishop Point Rd pull-in. Rough-hewn steps down to sand flats. Only accessible at low tide and even then some wading through shallow channels required.
- B. An old 4WD access track along the edge of the inlet. You can walk along it but keep to the waters edge and do not cross the fence to your right. Avoid walking on any dry shingle areas as these may contain nesting sites.
- C. Walk along the beach to the end of the dunes. The blue lines are delineated access paths through the dunes otherwise do not cross the fence to your left.

NB – The channel to the sea shown in the photo does not currently exist as at 01 January 2019
